## THE GEELONG COLLEGE UPGRADE THEIR MIDDLE SCHOOL SPORTS PRECINCT

Grassports were engaged by The Geelong College in early 2023 for several projects on their agenda.

The primary undertaking involved the construction of a state-of-the-art nine-lane cricket practice net facility spanning 1,057m<sup>2</sup>. This encompassed the fabrication of the concrete slab, installation of black mesh fencing around the facility and within the lanes, as well as the supply and installation of Centurion 11mm turf in each of the nine lanes and Shield 9mm for the surrounding areas. Six of the nine lanes feature the exclusive Grassports Cricket Training System.

Coordinating the completion of the cricket net facility, the project to resurface six acrylic netball courts commenced.

The courts, totalling 3,333m<sup>2</sup> and arranged in groups of two and four, underwent a transformation from a dull, worn-out green to a vibrant Laykold green, giving them a fresh and rejuvenated appearance. These courts are made complete with netball line markings in yellow and tennis line markings in white, enhancing their functionality and adding a professional touch. The vibrant colours not only contribute to the aesthetic appeal but also provide a dynamic and engaging space for students.

The revitalised middle school has become a hub of activity, breathing new life into this ever-growing campus. Students now have access to top-notch facilities that promote both physical activity and a sense of community. As we witness the positive impact of these transformations, we are thrilled and look forward with great excitement to continuing our collaboration with The Geelong College, shaping more inspiring projects for the future.
